Omkar Joshi

Vellore, Tamil Nadu, India | +91 9619612140 | omki.yj@gmail.com | github.com/OmkarJ212

Education

Vellore Institute of Technology (VIT) Vellore, India
Bachelor of Technology in Engineering ***(CGPA: 9.48 / 10.0)*** *Expected June 2028*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Discrete Mathematics, Linear Algebra.

Senior Secondary & Secondary Education India
Class XII: 82.0% | Class X: 92.1%

Technical Skills

Languages: Python, C, C++, Java
Web & AI Frameworks: Full-Stack Web Development, Agentic AI, REST APIs, JSON Data Handling
Databases & Tools: SQL, Git, GitHub, Terminal Environments
Core Competencies: Algorithm Design & Optimization, Data Structures, System Architecture

Certifications

IBM Certified Course in Agentic AI — Specialized training covering autonomous agent architectures, AI workflows, and practical application development.

Projects & Engineering Experience

Project Team Finder Platform | *Full-Stack Web Application*

- Engineered a web platform to streamline skill-based team formation for academic projects and hackathons.
- Implemented backend logic to match candidates with dynamic project requirements based on skill sets, roles, and user availability.

Leetflix | *Web-Based Media Trivia Platform*

- Architected a full-stack trivia application featuring dynamic question modules and a real-time global leaderboard.
- Optimized database queries and backend response times to maintain smooth multi-user concurrency.

Terminal-Based Task Manager | *Python Productivity Tool*

- Built a high-performance CLI task management application leveraging custom linked list data structures.
- Implemented Merge Sort algorithms for task prioritization alongside structured JSON data persistence.

Academic & Extracurricular Achievements

AgriSphere (Smart Farming & Sustainable Systems): Participated in technical workshops on applied AI and automated resource allocation.

AI & Sustainability Research: Conducted data collection and statistical analysis on public trust in AI-driven climate solutions.
